RUSLANA MATVIIENKO

FRONTEND DEVELOPER

I'm a junior frontend developer with skills in HTML, CSS, JavaScript (Hooks + Redux), REST APIs, and GitHub. I also have team experience using these tools, which I've worked hard to learn.
Perseverance is one of my strongest character traits, and it has helped me develop the necessary skills for web development. This field brings me a lot of joy, as it allows me to apply my creativity and skills both independently and as part of a team of talented developers.
