

RUSLANA MATVIIENKO

FULL STACK DEVELOPER

"I am a junior full-stack developer with skills in HTML, CSS, JavaScript (Hooks + Redux), Node, REST API, and GitHub, with experience working in a team. Perseverance has helped me develop the necessary skills for web development. This field brings me joy, as it allows me to apply my creativity both independently and as part of a team.

I am currently looking for remote part-time work (on the side) where I can apply my skills and continue to grow professionally. If you are looking for a dedicated developer, I would be happy to discuss how I can become a valuable part of your team."
